

Field Archaeologists Needed in SW Utah

EnviroSystems Management, Inc. is seeking to fill several field archaeologist positions to conduct cultural resource inventories near St. George, Utah for the BLM. We are looking for a minimum of 6 months of experience in archaeological survey (preferably 3 months of this being in the Southwest), and completion of a B.A. in Anthropology or related field and an archaeological field school. Familiarity with completion of IMACS forms and GPS use is preferred, and the ability to survey in remote areas over relatively steep terrain for extended periods of time is a must. Wages are competitive and commensurate with your experience, and per diem is provided by EnviroSystems at the CONUS rate of \$31.00/day. Lodging will be a combination of hotel accommodations and camping; those hired will therefore need to have their own basic camping equipment. Fieldwork is slated to begin on October 5, 2005 and will last about 8 weeks. For immediate consideration, please email your resume with references to lneal@esmaz.com.

Lynn A. Neal, RPA
Vice President & Sr. Archaeologist
EnviroSystems Management, Inc.
